Al Presidente

WORKING GROUP NATURAL DISASTERS

Questionnaire

0. FACT-FINDING FRAMEWORK (Typification of hazards)

- What are the natural disasters (*natural hazards*) that have most affected your Region from 2009 up till today?
- What kind of risks are you mostly exposed to with regards to hydro-meteorological (*hydro-meteorological hazards**) and geophysical (*geophysical hazards***) events?

1. STATE OF THE ART

2.1 Disaster risk reduction and management

- What are the powers of the Region in terms of natural disasters? (General description)
- Could you indicate us what kind of specific measures, if any, your Region has taken about risk prevention? (e.g. **disaster risk reduction and policy for disaster prevention**)?
- What kind of measures have proved to be more suitable and you find that could be used successfully also in other contexts?
- Do you think that the European legal framework is complete with regards to preventative risk management in respect of natural disasters? What strengths do you think are worthwhile to establish evermore effective measures?
- Could you indicate us the best practices about risk prevention that your Region has applied also beyond the institutional contexts (i.e. for private or associations or NGOs initiatives) from which could be drawn useful lessons to increase the current legislation?

CONSIGLIO REGIONALE

Al Presidente

2.2 Emergency management and compensation of the damages caused by natural disasters

- Do you suppose that the European Union has taken exhaustive measures for the management of the risk? (cf. i.e. proposal to amend of the article 120 of the reg. UE 1303/2013; cf. also The European Union Solidarity Fund (EUSF) established with the reg. UE 2012/2002 and the EU **Civil Protection Mechanism**).
- Do you think that the european legislation on state aid about damage caused by natural disasters is complete? (Cf. i.e. art 50 reg. UE 651/2014)

2. ANALYSIS OF NEEDS

- Couls some issues be resolved better by the European Union? (Indicate possible measures that the European Union could be taken , obstacles/problems set by the current European legislation, any proposals for amendments, i.e. possibility for granting State aid also for the prevention of the damages, etc.).
- What do you think about the possibility to engage in production the best practices relating to prevention of the risk in your contexts? What incentives/stimulus do you suppose would be more effective?

(*) **Geophysical hazards:** eg. snow avalanche, landslide, earthquake, volcano;

(**) **Hydrometeorological hazards:** eg. storm, extreme temperature events, forest fire, drought, flood.

To be sent by 30th April 2017 to:

President Giuseppe Di Pangrazio – Regional Parliament of Abruzzo
